SUBJECT: East Loveland Avenue Waterline

Dear Mr. Barfels:

The City currently has a 4-inch water line in East Loveland Avenue extending from approximately Second Street to the City Limits. This line is not sufficient to provide adequate fire flow for any residents that are served.

Users on the line at the City Limit will have a maximum of approximately 90 to 100 gpm fire flow. This is well below flow rates recommended for residential development. Extending an 8-inch line from East Second Street to the City Limits will result in increasing the available fire flows to approximately 1,000 gpm, or slightly above recommended residential rates. It is strongly suggested that the City proceed with this project to further enhance the City's fire protection system. This project is in agreement with the Water Distribution Study completed in 1987.

Very truly yours,

JONES & HENRY ENGINEERS, INC.

ADDITIONAL SUPPORT INFORMATION

For Fiscal Year 1994 (July 1, 1993 through June 30, 1994), jurisdictions shall provide the following support information to help determine which projects will be funded. Information on this form must be accurate, and where called for, based on sound engineering principles. Documentation to substantiate the individual items may be required by the Support Staff if information does not appear to be accurate.

- 1) What is the condition of the existing infrastructure to be replaced, repaired, or expanded? For bridges, submit a copy of the current State form BR-86.

Closed _____

Poor X _____

Fair _____

Good _____

Give a brief statement of the nature of the deficiency of the present facility such as: inadequate load capacity (bridge); surface type and width; number of lanes; structural condition; substandard design elements such as berm width, grades, curves, sight distances, drainage structures, or inadequate service capacity. If known, give the approximate age of the infrastructure to be replaced, repaired, or expanded.

Existing four (4) inch mains provide inadequate flow for fire protection.

Refer to Jones and Henry Engineers, Inc. letter dated 9/30/92.

- 2) If State Issue 2 funds are awarded, how soon (in weeks or months) after receiving the Project Agreement from OPWC (tentatively set for July 1, 1993) would the project be under contract? The Support Staff will be reviewing status reports of previous projects to help judge the accuracy of a particular jurisdiction's anticipated project schedule.

1 weeks months (Circle one)

Are preliminary plans or engineering completed? Yes No

Are detailed construction plans completed? Yes No

Are all right-of-way and easements acquired? Yes No N/A

Are all utility coordinations completed? Yes No N/A

Give an estimate of time, in weeks or months, to complete any item above not yet completed. 4 weeks months

- 3) How will the proposed project impact the general health, safety and welfare of the service area? (Typical examples may include the effects of the completed project on accident rates, emergency response time, fire protection, health hazards, user benefits, and commerce.) Please be specific and provide documentation if necessary to substantiate the data.

Project will increase fire flow from 100 GPM to 1,000 GPM. Refer to

Jones and Henry Engineers, Inc. letter dated 9/30/92.

- 4) What type of funds are to be utilized for the local share for this project?

Federal	_____	ODOT	_____	Local	_____

Other	None _____				

Note: If MRF funds are being used for the local share, the MRF application must have been filed by August 1, 1992 for this project with the Hamilton County Engineer's Office.

The minimum amount of matching funds for grant projects (local share) must be at least 10% of the TOTAL CONSTRUCTION COST. What percentage of matching funds are being committed to this project?

0 %

- 5) Has any formal action by a federal, state, or local government agency resulted in a complete or partial ban of the use or expansion of use for the involved infrastructure? (Typical examples include weight limits, truck restrictions, and moratoriums or limitations on issuance of building permits.) A copy of the legislation must be submitted with the application. THE BAN MUST HAVE AN ENGINEERING JUSTIFICATION TO BE VALID.

Complete Ban _____ Partial Ban _____ No Ban X

Will the ban be removed after the project is completed?

Yes _____ No _____

- 6) What is the total number of existing users that will benefit as a result of the proposed project?

Approximately 600 users

For roads and bridges, multiply current documented Average Daily Traffic by 1.20. For public transit, submit documentation substantiating the count. Where the facility currently has any restrictions or is partially closed, use documented traffic counts prior to the restriction. For storm sewers, sanitary sewers, water lines, and other related facilities, multiply the number of households in the service area by 4.

- 7) Has the jurisdiction developed a Five Year Capital Improvement Plan as required in O.R.C., chapter 164? (This must be included with the application to be considered for funding.)

Yes _____ No _____

Will be submitted by December 31, 1992.

- 8) Give a brief statement concerning the regional significance of the infrastructure to be replaced, repaired, or expanded.

The regional significance is limited to the area serviced by this
water main.
